

Professional DJ Controller with Motorized Platters

This professional DJ controller replicates the feel and functionality of traditional vinyl turntables while integrating digital music control. It features motorized, high-torque direct-drive platters that simulate the tactile experience of spinning vinyl, allowing for precise scratching, beatmatching, and mixing.

Overview

Professional Performance Controller

This high-resolution digital DJ controller is engineered for professional performance, featuring direct-drive, motorized turntable platters that provide the authentic tactile feel of vinyl. Built with rugged, all-metal construction and audiophile-grade 24-bit circuitry, it offers a robust platform for mixing, scratching, and beatmatching. The system includes extensive loop, cue, and track-access controls, along with an integrated laptop stand for a streamlined setup in any gig environment.
