

Professional Film Projector

This professional-grade film projector is designed for projecting film reels. It features a robust mechanical design and a high-intensity light source.

Overview

Professional Film Projection Excellence

This professional-grade film projector is engineered for high-performance audio-visual playback in demanding environments like cinemas and theaters. It combines a robust mechanical transport system with a precision optical array to ensure sharp, color-accurate imagery. With integrated sound reproduction and advanced safety mechanisms, it offers a reliable solution for professional projection needs.

Technical Capabilities

Performance Highlights

1 Mono/Stereo

Audio Channel Options

Supported Media

Multiple Film Formats, Adjustable Frame Rates

Design & Construction

Build Features

- Robust mechanical design for reliable film transport
- High-intensity light source
- Precision optical system
- Integrated sound reproduction

Safety Compliance

Film Damage Prevention • User Safety Protocols
