

Professional Hand Saw with Alloy Steel Blade

This professional-grade hand saw features 3-angles ground hardened teeth for efficient cutting. The blade is constructed from 65Mn premium alloy steel and fully polished with a clear lacquer coating.

Overview

Professional Grade Cutting Performance

This professional-grade hand saw is engineered for efficiency and durability in woodworking and general cutting tasks. It features a premium 65Mn alloy steel blade that is fully polished and lacquer-coated for superior longevity. The ergonomic bi-material handle ensures a secure, non-slip grip, providing the precision and control required for demanding projects.
