

Professional Hand Saw with Rubber Grip

This professional hand saw features an ergonomic rubber grip for comfortable and secure handling. The precision ground teeth are impulse hardened for increased durability and cutting efficiency.

Product Overview

Precision and Efficiency

This professional-grade hand saw is engineered for speed and precision, featuring aggressive teeth ground on three edges for superior cutting performance. Designed with an ergonomic rubber grip, it ensures comfort and secure handling during extended use. The impulse-hardened teeth provide increased durability, making this a reliable tool for demanding professional applications.
