

Professional Pruning Shear

This professional pruning shear is designed for efficient and precise cutting in gardening and landscaping. It features durable construction with high-quality steel blades for long-lasting performance.

Product Overview

Professional Performance Gardening Tool

This professional-grade pruning shear is engineered for efficiency and reliability in landscaping and horticultural applications. Crafted from high-quality Japanese SK5 steel, the fine-ground blade ensures clean, precise cuts while minimizing plant damage. The ergonomic aluminum handle with PVC coating is designed to maintain comfort and security during continuous, heavy-duty use.

Technical Details

Cutting Diameter

5 mm

Min Cutting Diameter

15 mm

Max Cutting Diameter

Adjustable Features

- Precision blade adjustment system
- Precision counterblade adjustment system
- Built-in buffer
- Integrated shock absorbers

Blade Material

Japanese SK5 Steel

Design and Ergonomics

Usage Environment

Professional Use • Continuous Duty

Handle Construction

Aluminium, PVC Coated, Ergonomic Design
