

Professional TV Transmitter

This professional-grade TV transmitter is designed for broadcasting applications. It features robust construction, high efficiency, and reliable performance.

Product Overview

Professional UHF TV Transmitter

This professional-grade UHF transmitter is engineered for high-performance broadcasting applications. Designed with a focus on robust construction and energy efficiency, it ensures reliable signal distribution for television stations. The unit provides the stability required for demanding professional environments.

Technical Specifications

Frequency Band	UHF
Application	Broadcasting, Television Station

Performance

Key Performance Indicators

1
High Efficiency Rating

Features

Design Features

- Robust physical construction
- High-efficiency power output
- Designed for continuous operation
