

Programmable 24-Hour Timer Switch

This programmable timer switch is designed for automated electrical appliance control. It features a 24-hour dial with multiple on/off settings, allowing for precise scheduling of electrical devices.

Product Overview

Automated Control Solution

The TH-187 Programmable 24-Hour Timer Switch is a reliable device engineered for precise automated control of electrical appliances. Designed for both residential and commercial applications, it facilitates the scheduling of heating, lighting, and ventilation systems. Its durable construction and intuitive dial interface make it an essential tool for enhancing energy efficiency and operational convenience.

Technical Specifications

Operating Cycle	24 hours
Control Method	Manual dial with multiple on/off settings
Housing Material	Durable plastic

Installation and Compatibility

Installation	Easy installation with clearly marked wiring terminals
--------------	--

Applications

Common Use Cases	Lighting Systems, Heating Systems, Ventilation Systems, Energy Saving
