

Programmable Smart Card for Access Control

This is a programmable smart card used in access control systems. It provides secure and reliable access management.

Product Overview

Programmable Smart Card Solution

This programmable smart card provides a secure and reliable solution for professional access control systems. Engineered for high-performance security environments, the card integrates seamlessly with standard reader hardware. Its robust design ensures durability and consistent communication for daily enterprise use.

Technical Specifications

Compatibility

- Standard RFID Readers
- Programmable Gate Systems
- Building Management Infrastructure

Card Type	Programmable Smart Card
Primary Application	Access Control, Secure Entry, Enterprise Security
