

Propylene Refrigeration Compressor Suction Tank

This suction tank is designed for use with propylene refrigeration compressors. It is certified to ASME U/U2/N/NPT standards and ISO9001.

Product Overview

Industrial Propylene Refrigeration Compressor Suction Tank

This high-capacity suction tank is engineered for specialized propylene refrigeration processes. Built to withstand extreme conditions, the unit features robust 09MnNiDR construction designed for performance in demanding industrial environments. Its specialized thermal range ensures reliable operation in cryogenic and pressurized refrigeration cycles.

Technical Specifications

Design Pressure

0.724 Mpa

Max Pressure

-0.0175 Mpa

Min Pressure

Temperature Range

-45 °C

Minimum Temperature

65 °C

Maximum Temperature

Material Grade

09MnNiDR

Dimensions

3800mm x 38815mm x 18mm

Weight

76 T
