

Protective Knee Pad with Hard Shell

This durable knee pad is designed for comfort and protection during various tasks. It features a hard, clear plastic outer shell with ribbed reinforcement for impact resistance and a soft, cushioning interior for extended wear.

Product Overview

Professional Protection

This durable knee pad is engineered to provide superior protection and comfort during demanding tasks. Featuring a hard, clear plastic outer shell with ribbed reinforcement, it offers excellent impact resistance for rigorous environments. The interior is lined with soft cushioning to ensure comfort during extended periods of wear, while adjustable straps guarantee a secure and customized fit for any user.
