

Pruning Reciprocating Saw Blade for Wood and Nails

This reciprocating blade is designed for pruning and cutting nail-embedded wood. The blade features a 9-inch length and 3 teeth per inch.

Product Overview

Professional Pruning Performance

This reciprocating saw blade is engineered for high-performance cutting in demanding outdoor and construction environments. Featuring premium carbide-tipped teeth, it excels at pruning tasks and cutting through tough, nail-embedded wood. Its robust design ensures durability and efficiency, making it an essential tool for professional landscaping and renovation projects.

Technical Specifications

Blade Length	228 mm
Blade Length (Imperial)	9 in
Teeth Per Inch	3

Features

Suitable Applications

- Pruning
- Nail-embedded wood
- Clean wood

Material Technology	Carbide Tipped
