

Pruning Saw with Curved Blade

This pruning saw is designed for efficiently cutting branches and limbs. It features a curved blade for aggressive cutting action and an ergonomic handle for comfortable use.

Product Overview

Professional Pruning Performance

This high-performance pruning saw is engineered for the efficient cutting of thick branches and limbs. The specialized curved blade design ensures aggressive cutting action, making garden and forestry maintenance tasks faster and less labor-intensive. Crafted from high-carbon steel, the blade provides exceptional durability, long-lasting sharpness, and superior resistance to corrosion for extended service life.

Technical Specifications

Blade Material	High-carbon steel
Blade Shape	Curved

Features

Key Features

- Ergonomic handle for reduced fatigue
- Aggressive curved blade geometry
- Corrosion-resistant coating
- Durable protective sheath included

Operational Benefits	High Performance, Corrosion Resistant, Ergonomic
