

Pruning Shear for Gardening

This pruning shear is designed for efficient and precise cutting in gardening and landscaping. It features a durable blade for clean cuts and ergonomic handles for comfortable use.

Product Overview

Designed for Continuous Gardening Performance

These professional pruning shears are engineered for precision and endurance in demanding landscaping environments. Featuring high-grade Japanese SK5 steel blades, they ensure clean cuts that promote plant health. The ergonomic handle design with shock-absorbing features is specifically optimized to reduce hand fatigue during extended periods of continuous professional use.

Technical Specifications

Cutting Capacity

5 mm

Minimum Diameter

15 mm

Maximum Diameter

Blade Material

Japanese SK5 Steel

Adjustment Mechanism

Precision Blade Adjustment, Counterblade Alignment

Build Quality

Ergonomic Features

- Ergonomically shaped handles
- Integrated buffer system
- Shock absorbers for reduced vibration

Handle Construction

Aluminium with orange PVC coating
