

PTC Ceramic Space Heater

This ceramic space heater utilizes PTC (Positive Temperature Coefficient) technology for efficient heating. It is suitable for spaces of 20 to 25 square meters.

Product Overview

Versatile PTC Ceramic Heating Solution

This PTC ceramic space heater provides a versatile and safe heating experience for professional or residential environments. Featuring three distinct power modes and wind temperature settings, it allows for customized climate control tailored to your specific needs. With built-in oscillation and safety features, it combines efficient performance with reliable operation.

Performance Specifications

Power Modes

| | | |
|-------------------------------|------------------------------------|----------------------------------|
| 30 W Low Power Mode | 1000 W Medium Power Mode | 2000 W High Power Mode |
|-------------------------------|------------------------------------|----------------------------------|

Wind Temperature Choices

Cool Wind, Warm Wind, Hot Wind

Design and Usability

Oscillation Angle 90 degrees

Portability Yes

Safety Features

Safety Certifications/Features

Overheat Protection
