

# PTO-Driven Fertilizer Spreader

This fertilizer spreader is designed for efficient and uniform distribution of granular fertilizers. It features a stainless steel hopper, adjustable flow rate controls, and a three-point hitch system.

## Overview

### Professional Fertilizer Spreader

This PTO-driven fertilizer spreader is a robust agricultural machine engineered for the efficient and uniform distribution of granular fertilizers. Designed with a durable stainless steel hopper and a heavy-duty frame, it ensures long-term reliability and corrosion resistance in demanding field conditions. The unit features precision controls and a standard three-point hitch, making it a versatile and essential tool for optimizing crop yields and reducing fertilizer waste.

## Technical Specifications

Drive Mechanism	PTO-Driven
Construction Materials	Stainless Steel Hopper, Heavy-Duty Steel Frame
Mounting System	Three-point hitch

## Operational Features

### Key Operational Features

- Adjustable flow rate controls
- Uniform granular distribution
- Corrosion-resistant hopper design
- Consistent PTO-driven spreading action

### Performance Highlights

**1 High**

Application Precision

**1 Optimized**

Waste Reduction
