

# PTO Rotary Tiller for Compact Tractors

This PTO rotary tiller is designed for connection to compact tractors, providing efficient soil preparation and cultivation. It features a chain-driven transmission and a graphite casting iron gearbox for enhanced durability.

## ADDITIONAL IMAGES

## Product Overview

The rotary tiller integrated with a compact tractor, demonstrating its application in small-scale soil preparation.

### Versatile PTO Rotary Tiller

This PTO-driven rotary tiller is engineered for efficient soil preparation and cultivation on small to medium-sized farms. Designed for 15-35hp compact tractors, it features a robust graphite casting iron gearbox and a flexible chain-driven transmission for reliable performance. With adjustable tilling height and integrated side protection plates, it ensures a fine tilth while preventing soil displacement during operation.

## Technical Performance

### Performance Highlights

**540 rpm**

PTO Input Speed

**15 hp**

Min Tractor Power

**35 hp**

Max Tractor Power

**Transmission System**

Chain driven

**Gearbox Material**

Graphite casting iron

## Design & Safety

### Adjustable Components

- Hand adjustable chain device
- Adjustable tilling height
- Deformation-resistant suspension plate

### Linkage System

Three point linkage

### Safety & Protection

Protection Bar, Side Protection Plates, Rear Deflection Shield

## Model Specifications

### Model Comparison

Model	Working Width (cm)	Weight (kg)	Blades	Dimensions (mm)
RT-85	85	110	16	950*550*560
RT-95	95	115	16	1050*550*560
RT-105	105	125	20	1150*550*560
RT-115	115	135	24	1250*550*560
RT-125	125	145	28	1350*550*560
RT-135	135	155	32	1450*550*560
