

Puffed Corn Snack Extruder

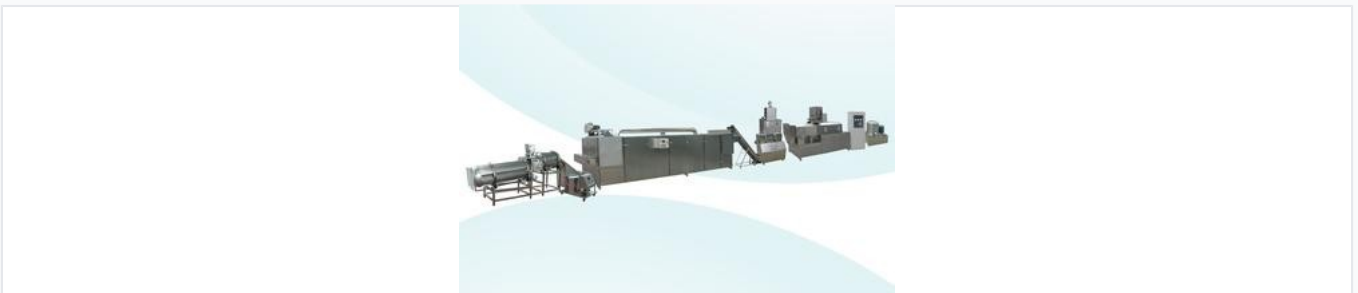

This machine is designed for producing puffed corn snacks in various shapes. It performs mixing, extruding, shaping, cutting, drying, and flavoring in one continuous operation.

ADDITIONAL IMAGES

Product Overview

The integrated processing line features a robust extruder and drying system for consistent, high-quality output.

Advanced Puffed Snack Production

This industrial-grade puffed corn snack extruder is engineered for high-performance, continuous production. The system automates the entire manufacturing process from initial mixing through to final flavoring, ensuring consistent product quality and texture. With its flexible modular design, operators can easily switch molds and process technology to produce a wide array of snack shapes and core-filled products.

Automation

Full automatic (one-pass operation)

Technical Specifications

Process Steps

- Mixing
- Extruding
- Shaping
- Core-filling
- Cutting
- Drying
- Flavoring

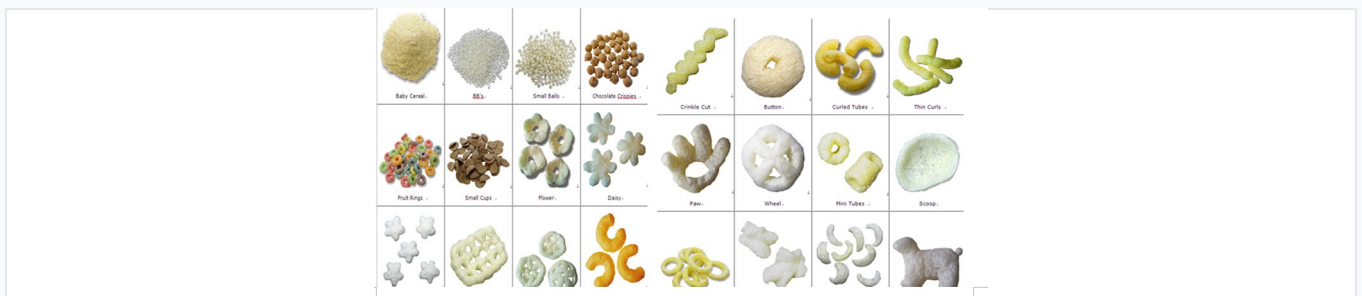

Capacity

150 kg/h

Dimensions (L x W x H)

2000 x 1500 x 2200 mm

Capabilities

The machine's versatility allows for the production of diverse snack shapes including rings, tubes, balls, and specialty items.

Available Shapes

Rings • Flowers • Balls • Strips • Moons • Stars • Tubes • Hearts • Wheels • Fruit Loops

Specialty Products

- Core-filling snacks
- Chocolate filled bars
- Cream filled pillows
- Baby cereal
- Chocolate crispies

Compatible Ingredients

Corn, Rice, Wheat, Oat, Barley
