Product Overview

Sustainable Tableware Production

This high-efficiency pulp fiber tableware forming machine is designed for the sustainable production of eco-friendly, waterproof, and oil-proof disposable items. Engineered for precision and consistent quality, it is an ideal solution for mass-producing plates, bowls, and various containers. The robust construction ensures reliable operation, supporting manufacturers in achieving environmentally responsible production goals.

Technical Specifications

Model Name	BY040
Mould Size	1100*800mm
Pressure	40 ton
Capacity per Set	32.5 kg/h

Operational Features

Tableware Properties

Water proof • Oil proof • Sustainable

Operation Mode	Manual operation, Robot compatible
