

# Pump Control Box for Motors up to 1.5kW

This control box is designed for single-phase pumps with motor power up to 1.5kW. It provides manual operation and ensures reliable operation and protection for the pump.

## Product Overview

### Professional Pump Control Solution

This manually operated single-phase control box is engineered to provide reliable management for pump motors with a power capacity up to 1.5 kW (2 HP). Designed for seamless integration and ease of use, it provides a stable electrical environment to ensure pump longevity. It adheres to international quality and safety benchmarks to meet demanding industrial and commercial application requirements.
