

Pure Lead AGM Battery for UPS and Renewable Energy

This pure lead AGM battery provides excellent performance for applications in unstable AC power systems. Its long cycle life is achieved with a special paste formula and optimized manufacturing process.

Overview

High-Performance Pure Lead Technology

These advanced pure lead AGM batteries are engineered for applications that demand extreme reliability and long service life. By utilizing high-purity materials, they provide exceptional deep cycling capabilities and robust power output in critical environments. Designed for versatility, they are ideal for telecommunications, uninterruptible power supplies (UPS), and renewable energy storage systems.

Key Features

Performance Metrics

1000 T

Model Capacity Designator

Reliability & Endurance

Deep Cycle, High Temperature Tolerance, Extended Float Life, High Power Output

Applications

Suitable Industries

- Telecommunications
- Uninterruptible Power Supplies (UPS)
- Renewable Energy Systems
- Critical Power Infrastructure
