

Pure Lead Battery for UPS and Renewable Energy

This high-performance pure lead battery is designed for demanding applications. It offers superior reliability, extended cycle life, and exceptional power density.

Product Overview

High-Performance Pure Lead Technology

This advanced Pure Lead battery is engineered for critical power applications requiring superior reliability and extended cycle life. Utilizing a specialized lead-tin alloy, it delivers exceptional power density and high-rate discharge capabilities. It is the ideal energy storage solution for demanding environments such as uninterruptible power supplies, telecommunications, and renewable energy systems.

Technical Specifications

Battery Type	VRLA (Valve-Regulated Lead-Acid)
Model Number	PLH 1500T

Key Features

Main Advantages	Pure Lead Tin Alloy, High Rate Discharge, Extended Life, Superior Reliability
-----------------	---

Applications

Typical Applications

- Uninterruptible Power Supplies (UPS)
- Telecommunications
- Renewable Energy Systems
- Critical Power Backups
