

Pure Sine Wave Inverter Charger

This pure sine wave inverter charger converts DC power to AC power. It ensures a stable and clean AC power source for various applications.

ADDITIONAL IMAGES

Overview

Reliable Power Conversion

This pure sine wave inverter charger provides a stable and clean power source suitable for critical applications including microcomputer systems, communication networks, and medical facilities. Designed for versatility, it features automatic voltage and frequency stabilization to ensure consistent performance. With its robust construction and intelligent switching capabilities, it serves as an essential solution for maintaining continuous power in demanding professional environments.

Technical Specifications

Output Voltage	220V±10% or 110V (Automatic Stabilized)
Charging Input Voltage	220V±10%
Output Frequency	50Hz±2% (Automatic Stabilized)
Switching Time	3 s
Efficiency	0.7 %
Under-voltage Protection	14.5-15V (for 12V battery)

Compliance & Certification

Certifications	CE, ISO 9001
----------------	--------------

Applications

Suitable Applications

- Microcomputer systems
- Communication systems
- Hospitals
- Lighting tools
- Stores
