

Push Fertilizer and Seed Spreader

This push spreader is ideal for distributing fertilizer, seeds, salt, and ice melt. It features a PP plastic hopper, a handle, and solid wheels for easy movement across lawns and gardens.

Product Overview

Professional Grade Spreader

The TC2026 Push Fertilizer and Seed Spreader is a robust tool designed for the efficient and even distribution of granular materials. Featuring a high-capacity hopper and a durable powder-coated steel frame, it is built to withstand rigorous use in both residential and commercial settings. Its pneumatic tires and ergonomic design ensure smooth maneuverability and comfortable operation across diverse terrains.

Technical Specifications

Hopper Capacity (Weight)	20 kg
Hopper Capacity (Volume)	20 L
Frame Material	Powder coated steel

Performance Features

Core Features

- Corrosion-resistant hopper
- Adjustable flow rate control
- Pneumatic tires for terrain mobility
- Ergonomic handle

Performance Metrics

45 lb

Hopper Capacity

Suitable Materials

Fertilizer, Seeds, Granular Materials
