

Push Fertilizer Spreader with Steel Frame

This push fertilizer spreader has a 20kg capacity hopper and a gear system designed to withstand the elements. It is supported by a rugged, powder-coated steel frame.

Product Overview

Professional Grade Fertilizer Spreader

This manual push spreader is engineered for efficient distribution of fertilizer, seeds, salt, and ice melt in both farming and gardening environments. Featuring a durable PP plastic hopper and a robust steel frame, it ensures longevity and consistent performance for landscaping tasks. Its user-friendly design and solid wheels provide excellent maneuverability, making it an ideal helper for covering large areas with precision.
