

PVC Auto-Recovery Rolling Shutter Door

This rolling shutter door is designed for efficient and reliable operation in industrial environments. The auto-recovery function automatically re-inserts the curtain into the tracks after accidental impacts.

Product Overview

High-Performance Auto-Recovery Rapid Rolling Shutter

This high-speed PVC rolling shutter is engineered for demanding industrial and commercial environments, including warehouses, factories, and cold storage facilities. Featuring an innovative auto-recovery mechanism, the curtain automatically re-inserts itself into the tracks after accidental impacts to significantly minimize operational downtime. Its robust construction ensures long-term durability, providing a reliable and efficient solution for high-frequency opening and closing cycles.

Technical Specifications

Door Type	Auto-Recovery Rapid Rolling Shutter
Curtain Material	PVC
Fire Resistance	Yes
Color Options	Multicolor

Applications

Suitable Environments

- Warehouse
- Cold Storage
- Cleanrooms
- Manufacturing Facilities
