

PVC Cable Ties

PVC cable ties are available in top tie, side tie, and double tie configurations. Constructed from durable PVC, these ties are suitable for various cable management applications.

Product Overview

Professional PVC Cable Management Solutions

These PVC cable ties are engineered for securely holding plastic-jacketed conductors on insulators. Crafted from durable PVC material, they offer exceptional resistance to UV radiation and environmental contaminants. Their design ensures steady tensile strength, providing reliable performance for power engineering and general contracting applications.

Technical Specifications

Material	PVC (Polyvinyl Chloride)
Key Properties	UV Resistant, Dirt Resistant, High Tensile Strength

Product Configurations

Available Configurations

- Top Tie
- Side Tie
- Double Tie

Applications

Suitable For

- Power Engineering
- General Contracting
- Cable Management
- Securing Plastic-Jacketed Conductors
