Product Overview

High-Performance Stainless Steel Fastening

These cable ties are engineered from high-grade 304 stainless steel to ensure superior corrosion resistance and structural integrity in demanding industrial environments. The inclusion of a durable PVC coating adds a critical layer of protection against chemical exposure, UV radiation, and physical abrasion. Designed for both indoor and outdoor utility, these ties offer a secure and reliable solution for bundling cables and hoses in transmission and distribution sectors.

Technical Specifications

Width Options

- 4.6
- 7.9
- 12

Material Grade	304 Stainless Steel
Length Range	100 - 1000 mm
Thickness	0.8 mm

Features

Product Characteristics

Corrosion Resistant • PVC Coated • Self-locking

Finish / Color	Natural, Black
