

# PVC Corrugated Pipe Production Line

This PVC Single Wall Corrugated Pipe Production Line is designed for the continuous extrusion of corrugated pipes from PVC materials. It is suitable for producing pipes with various diameters and corrugation patterns, offering high production efficiency and precise dimensional control.

## Product Overview

### High-Efficiency Corrugated Pipe Production

This PVC Single Wall Corrugated Pipe Production Line is engineered for the continuous and precise extrusion of corrugated piping solutions. It integrates a high-performance extruder, advanced forming machine, and efficient winding unit to ensure consistent output quality. Designed for versatility, this system supports various pipe diameters and corrugation patterns, making it an ideal choice for manufacturing drainage systems and electrical conduits.

## System Capabilities

Certifications	CE
Model Year	2000

## Technical Features

### Core Components

- Extruder
- Forming machine
- Winding unit
- Control system

### Control Features

- Advanced temperature control
- Speed regulation

## Applications

### Primary Applications

Drainage Systems • Electrical Conduit
