

PVC Insulated Copper Building Wire

This PVC insulated copper wire is suitable for internal wiring in switchboards and appliances. It is constructed with high-conductivity copper conductors and durable PVC insulation, and is available in various colors for circuit identification.

Product Overview

Professional Building Wire

This PVC insulated copper building wire is designed for reliable electrical connectivity in power installations, household appliances, and industrial machinery. Engineered for versatility, it supports diverse applications including construction lighting and internal wiring for electrically operated tools. Featuring high-purity copper conductors and durable PVC insulation, it ensures safe and efficient power transmission across various professional environments.

Technical Specifications

Rated Voltage

450 V

Rated Voltage Low

750 V

Rated Voltage High

Conductor Material	99.995% Pure Bare Copper or Tinned Copper
Insulation Material	PVC (Polyvinyl Chloride)
Rated Temperature	60 °C
Implementation Standard	GB5023

Design and Compliance

Available Colors

- Black
- White
- Blue
- Red
- Brown
- Green
- Yellow
- Yellow/Green

Certifications

CCC
