

PVC Insulated Electrical Wire

This PVC insulated wire is suitable for internal wiring of appliances, apparatus, and control gear. It features a plain annealed copper conductor and PVC insulation for safety and conductivity.

Product Overview

Professional Grade PVC Insulated Electrical Wire

This high-quality single-core electrical wire features a reliable plain annealed copper conductor, ensuring efficient electrical conductivity for professional installations. Designed for durability and safety, the robust PVC insulation makes it an ideal choice for internal wiring in appliances, switchgear, and control gear systems. It is meticulously engineered to meet stringent industry standards for building and construction projects.

Technical Specifications

Voltage Rating

450 V

Lower Voltage Limit

750 V

Upper Voltage Limit

| | |
|----------------------|---------------------------------|
| Cross-sectional Area | 1.5 mm ² |
| Conductor Structure | 1/1.38 |
| Industry Standards | 60227IEC01, BV, GB/T5023.3-2008 |

Logistics

| | |
|-----------------|-------|
| Standard Length | 100 m |
|-----------------|-------|

Application

Suitable Applications

- Construction industry
- Decoration industry
- Internal appliance wiring
- Switchgear and controlgear
- Electrical apparatus
