

PVC Insulated Flexible Cable - VDE H03VV Series

This PVC insulated flexible cable conforms to VDE H03VV series standards. It is designed for light-duty applications in dry locations, such as connecting small appliances and lamps.

Product Overview

VDE Certified Flexible Cable

The H03VV series is a high-quality, VDE-certified flexible PVC insulated and sheathed cable designed for light-duty electrical applications. It is engineered for safe use in dry locations, providing reliable connectivity for lamps, small home appliances, and similar portable equipment. The series offers versatile configurations to support varying power requirements in residential and light commercial settings.
