

PVC Insulated Twisted Pair Cable

This cable is part of the ZC-RVS series. It is designed for electrical connections and features PVC insulation and copper conductors.

Product Overview

Professional Connection Solutions

The ZC-RVS series represents a reliable solution for electrical interconnection requirements. Featuring a twisted pair design, this cable is specifically engineered to minimize electromagnetic interference during operation. The high-quality PVC insulation ensures durability and flexible handling, making it an ideal choice for diverse industrial and commercial wiring applications.

Technical Specifications

Series Model	ZC-RVS
Product Standard	JB8734.3-1998
Insulation Material	PVC
Conductor Material	Copper
Design Features	Twisted Pair, Flexible, EMI Shielding
