

# PVC Riser Pipe

PVC riser pipes are available in multiple specifications to suit diverse applications. The pipes have a standard length of 2 meters, but can be customized to meet specific customer requirements.

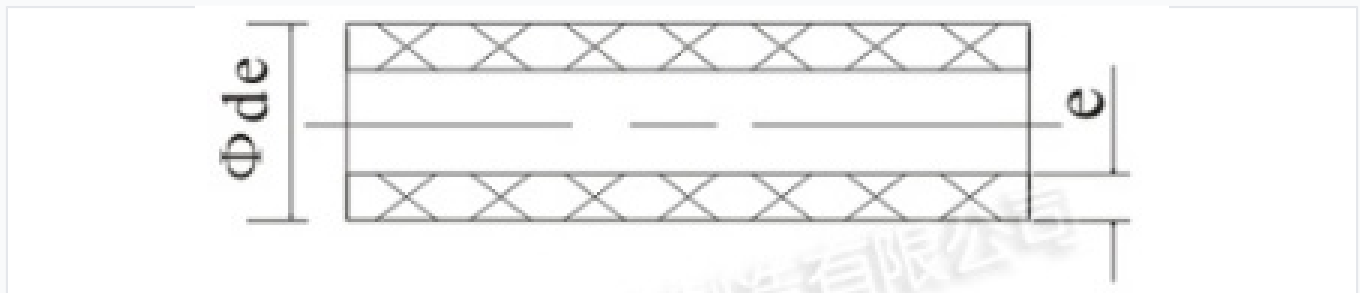

## Product Overview

### Professional PVC Riser Piping

These high-quality PVC riser pipes are engineered for durability and reliability in professional plumbing and fluid management applications. Available in five distinct diameter specifications, these pipes provide versatile options for varying flow requirements. Each unit comes in a standard 2-meter length, with custom length options available upon request to meet specific site installation needs.

## Technical Specifications
