

PVC Steel Wire Reinforced Hose

This PVC steel wire reinforced hose is designed for various applications. Its transparent PVC construction is reinforced with a steel wire helix for enhanced durability and resistance to crushing or kinking.

Product Overview

Professional Grade PVC Steel Wire Reinforced Hose

This high-performance hose features a robust steel wire helix embedded within flexible, high-quality PVC walls. Designed with a glass-like, mirror-smooth interior surface, it provides outstanding flow characteristics for various industrial and agricultural needs. The construction offers superior resistance to crushing and kinking, ensuring reliable performance in demanding vacuum and pressure applications.

Technical Specifications

Reinforcement	Steel wire helix
Body Material	Flexible PVC

Usage & Applications

Suitable Media

- Water
- Oil
- Powder
- Gases

Application Fields	Civil Engineering, Agriculture, Industrial Manufacturing
--------------------	--

Key Features

Key Advantages

Crush Resistant • Kink Resistant • Vacuum Rated • Transparent Visibility
