

PVC Wave Tile Production Line

This production line is designed for manufacturing PVC roofing tiles. It includes an extruder, shaping unit, cooling system, and cutting mechanism.

Overview

High-Efficiency PVC Wave Tile Production

This PVC wave tile production line is engineered for the high-volume manufacturing of durable roofing materials. The integrated system combines an extruder, a precision shaping unit, an advanced cooling system, and a reliable cutting mechanism to ensure consistent output. Designed for industrial-scale operations, this line delivers high-quality PVC tiles suitable for various roofing applications.

Technical Specifications

Production Capability

16 units

Production Capacity Index

Core System Components

- Extruder Unit
- Shaping Unit
- Cooling System
- Cutting Mechanism

Application

PVC Roofing Tiles, Wave Tile Board, Construction Materials
