

PVC Window and Door Single Head Welding Machine

This single-head welding machine is designed for PVC window and door manufacturing. It offers welding capabilities from 30 to 180 degrees, making it suitable for arc and special angle windows.

Product Overview

Professional PVC Welding Solution

The SH01 single head welding machine is a robust and efficient tool designed specifically for the manufacturing of PVC windows and doors. Built for high-volume production environments, this unit offers precision welding capabilities combined with a user-friendly interface. It ensures consistent, high-quality corner joints, making it an essential component for any modern fenestration assembly line.

Technical Specifications

Power Requirements

220 V

Voltage

50 Hz

Frequency

1.5 Kw

Input Power

Pneumatic Performance

0.6 MPa

Max Air Pressure

50 L/min

Air Consumption

Model

SH01

Welding Capability

Capacity

Parameter	Range/Value
Max. Welding Width	120mm
Welding Height	20-120mm

Physical Attributes

Overall Dimensions

960x910x1460mm

Key Features

Capabilities

Precision Welding, PVC Profile Compatible, Robust Construction, High-Volume Production
