

PVC Wire and Cable Extrusion Line

This PVC extruder line is designed for producing single-core wire, flat cables, and H05 cables. It is available in various models with capacity ranges including 30, 45, 65, 70, 90, 120, 150, and 200.

Product Overview

High-Efficiency PVC Extrusion Solution

This professional-grade PVC wire and cable extrusion line is engineered for high-precision manufacturing of single-core wires, flat cables, and H05 cables. Designed for versatility, the system supports a wide range of production capacities to meet diverse industrial requirements in the plastic and rubber machinery sector. Its robust construction ensures consistent output quality and reliable performance for demanding cable production environments.

Technical Specifications

Available Model Types

- 30
- 45
- 65
- 70
- 90
- 120
- 150
- 200

Industry Sector

Plastic Machinery • Rubber Machinery

Cable Applications

Single-core wire, Flat cable, H05 cable
