

# QSFP+ and CXP High-Speed Data Cables with MPO/MTP Accessories

These data cables are designed for high-speed transmission, featuring QSFP+ and CXP connectors. They are compatible with MPO/MTP accessories, suitable for various networking applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Data Connectivity

These high-speed cable assemblies provide cost-effective, high-density I/O solutions for 10G Ethernet and Fiber Channel applications. Designed to enhance data center infrastructure, they support multi-gigabit data rates and ensure reliable signal integrity. With hot-pluggable designs and backward compatibility, these solutions offer flexible and efficient networking performance.

## Performance Specifications

### Maximum Data Rate

**10.5 Gbps**  
Data Rate

### Compatibility

10G Ethernet, 10G Fiber Channel, 1Gbps Backward Compatible, SFP+ MSA

## Mechanical and Environmental

### Form Factor Features

- Hot-pluggable SFP 20PIN footprint
- Improved Pluggable Form Factor (IPF) compliant
- Enhanced EMI/EMC performance

### Operating Temperature Range

0 to 70 °C

## Applications

### Typical Applications

- Storage Area Networks (SAN)
- Network Attached Storage (NAS)
- Storage Servers
- Ultra-high bandwidth switches and routers
- Data center cabling infrastructure

## Compliance

### Certifications

RoHS Compatible
