

Quarter Turn Electric Actuator

This quarter-turn electric actuator is designed for precise control of valves. It is CSA certified and complies with UL standards, ensuring safety and reliability.

Overview

Precision Control for Industrial Applications

This quarter-turn electric actuator is engineered for reliable, automated valve control in demanding industrial environments, including HVAC&R systems. It features a robust construction with self-locking capabilities and versatile mounting options, ensuring operational stability and safety. Certified to stringent international standards, this unit provides precise feedback and efficient performance for various automation tasks.

Performance Metrics

Torque Range

18 Nm

Minimum Torque

2500 Nm

Maximum Torque

Duty Cycle

Model Type	Duty Cycle
18Nm / 160in.lbs	60%
All other models	70%

Certifications & Compliance

Quality Assurance

Factory Audit • Third-Party Tested

Certifications

CSA, UL 429, CSA C22.2, CE, RoHS 3.0

Technical Specifications

Manual Override Method

- Wrench
- Handwheel

Feedback & Control

- Limit switches
- Potentiometer (optional)
- Position transmitter (optional)
- 4-20mA output signal

Sealing Grade	NEMA 4/4X, IP67 (IP68 optional)
----------------------	---------------------------------

Mounting Standard	ISO 5211 Multi-flange
--------------------------	-----------------------

Power Supply	220V AC
---------------------	---------
