

Quarter-Turn Electric Valve Actuator IP67

These electric actuators are designed for use on butterfly, ball, and cock valves requiring 90-degree rotation. They feature IP67 protection and explosion-proof grade ExdaBT4.

Product Overview

Industrial Quarter-Turn Performance

This electric valve actuator is specifically engineered for quarter-turn operations, making it an ideal choice for butterfly valves, ball valves, and cock valves. Designed for demanding industrial environments, the unit features a robust, corrosion-resistant housing and reliable manual override capabilities. Its high ingress protection rating ensures consistent performance, while the inclusion of limit switches and position indicators allows for precise automated control.

Technical Specifications

Protection Class

IP67

Explosion-Proof Grade

Exd II BT4

Available Voltage Options

- 220V 50Hz
- 380V 50Hz

Features

Core Functionalities

Quarter-Turn Operation, Manual Override, Visual Position Indication, Adjustable Travel Stops, Corrosion Resistant

Applications

Compatible Valves

- Butterfly Valves
- Ball Valves
- Cock Valves
