

Quartz Radiant Space Heater

This radiant heater provides efficient and directional heating. It features a quartz heating element designed for rapid warm-up and focused heat distribution.

Product Overview

Efficient Radiant Heating

The Quartz Radiant Space Heater is engineered to provide rapid, focused heat distribution through high-performance quartz elements. Designed for versatility, the unit features an adjustable head and convenient wall-mounted installation to optimize space in small to medium-sized rooms. Its durable metallic housing ensures long-term reliability for demanding indoor environments.

Technical Specifications

Key Performance Metrics

1200 W

Max Rated Power

240 V

Max Voltage

Electrical Requirements

- Rated Voltage: 220-240V~
- Frequency: 50Hz
- Power Input: 1000-1200W

Design and Functionality

Operational Features

Pull chain control, Adjustable head, Wall-mounted

Compliance

Certifications

CE • GS • EMC
