

# Quartz Tube Electric Space Heater

This electric heater uses quartz tubes to generate heat. It offers two power settings, 400W and 800W, and includes tip-over protection for safety.

## Product Overview

### Compact Heating Solution

This quartz tube electric space heater is designed for efficient, localized heating in small spaces or personal work areas. Featuring a durable white plastic housing and a protective metal grill, it combines safety with a compact footprint. The unit offers user-friendly operation with dual heating level controls, allowing for customized warmth based on immediate needs.

## Design & Build
