

Quartz Tube Radiant Space Heater

This space heating apparatus is designed for household use. It features two quartz heating elements enclosed within a protective metal grille and offers two power settings.

Product Overview

Efficient Radiant Heating

The QH-1000D2 quartz tube radiant heater is designed to provide direct and immediate warmth for residential spaces. Featuring two adjustable power settings, this unit allows users to choose between 500W and 1000W to suit their specific heating needs. Its wide-angle reflector ensures effective heat distribution, making it an ideal supplemental heating solution for small to medium-sized rooms.
