Product Overview

High-Efficiency Fast Charging Solution

This versatile switching power supply is engineered for rapid and reliable device charging, supporting Quick Charge 3.0 technology. With intelligent voltage switching across three distinct modes, it optimizes power delivery to ensure safety and efficiency for smartphones, tablets, and other USB-powered electronics. Its compact design and robust protection features make it an ideal choice for professional-grade power management.

Technical Specifications

| | |
|-----------------------|-------------|
| Total Power Output | 18 W |
| Input Voltage Range | 100-240V AC |
| Input Frequency | 50-60Hz |
| Safety Certifications | GS, CE |

Charging Performance

Charging Modes

| Voltage | Current |
|---------|---------|
| 5V | 3.0A |
| 9V | 2.0A |
| 12V | 1.5A |

Supported Output Currents

- 0.5A
- 1.0A
- 2.1A

Key Performance Metrics
