

Quick Connect Pneumatic Coupling

This quick connect coupling is designed for efficient connection and disconnection of fluid lines. Its robust construction ensures a secure, leak-free seal for hydraulic and pneumatic systems.

Overview

High-Performance Quick Connect Solutions

This quick connect coupling is engineered for demanding industrial applications, providing a reliable and efficient way to manage fluid lines. Its robust construction ensures long-term durability while the design facilitates rapid connection and disconnection to minimize operational downtime. The coupling is specifically designed to maintain a secure, leak-free seal across both hydraulic and pneumatic systems.

Technical Standards

Quality Standards

ISO 9001

Measurement Systems

Imperial, Metric

Design & Application

System Compatibility

- Pneumatic Systems
- Hydraulic Systems
- Industrial Fluid Lines

Key Features

- Quick connect and disconnect functionality
- Leak-free sealing
- Robust metal construction
- Custom manufacturing available for special fittings

Interchange Standard

Aro 210 Interchange

Material Composition

Metal / Brass

Manufacturing Capabilities

Service Options

OEM, Custom Design, R&D Support
