Product Overview

Professional Refrigerant Can Tap

This specialized can tap is designed for accessing R134a and R12 refrigerant cans in automotive air conditioning systems. It features a robust construction with an ergonomic handle for easy, controlled piercing and a brass fitting to ensure a leak-proof connection. Suitable for both professional HVAC technicians and automotive mechanics, this tool is essential for efficient refrigerant handling and system maintenance.

Compatibility & Features

Application Types

- Automotive HVAC systems
- Refrigerant charging
- System maintenance

Compatible Refrigerants

R134a, R12

Design & Construction

Key Materials

Brass fitting • Durable plastic body

Design Features

- Side tap mechanism
- Ergonomic handle
- Circular clamp mechanism
- Supplementary insert for lubricant cans
