Product Overview

High-Efficiency Refrigeration Compressor

This LBP compressor is specifically engineered for high-performance beer cabinets and similar refrigeration applications. Designed to run on R134a refrigerant, it offers robust operation and reliability under demanding cooling conditions. Its compact design and optimized electrical configuration ensure consistent performance for professional-grade beverage storage equipment.

Technical Specifications

Refrigerant Type	R134a
Back Pressure Type	LBP (Low Back Pressure)

Electrical Requirements

Voltage/Frequency	220-240V / 50-60Hz
Phase	1PH

Certifications

Safety Compliance	CE, CB
-------------------	--------

Identification

Model Number	ADW86HV
Part Reference	10204210
