

R20 Zinc-Manganese Dry Cell Battery

This is an R20 type zinc-manganese primary battery. It delivers 1.5V of power and is commonly used in various low-drain devices.

Product Overview

Reliable Power Solution

The R20 Zinc-Manganese dry cell battery is designed for consistent and dependable energy delivery in a wide range of standard electronic applications. This classic battery chemistry offers a cost-effective power source for everyday devices. Each unit is carefully packaged to ensure safety and ease of handling for bulk distribution.

Product Details

Battery Size	R20
Chemistry	Zinc-Manganese

Packaging and Logistics

Packaging Configuration

Unit	Quantity
Cells per card	2
Cells per box	12
Boxes per carton	8
Total cells per carton	96

Shipping Specifications
