

R22/R410A Rotary Compressor

High-efficiency rotary compressor designed for use with R22 and R410A refrigerants. The robust construction ensures reliable performance in demanding cooling and heat pump applications.

Overview

High-Efficiency Rotary Compressor

This high-efficiency rotor compressor is engineered for reliability in both cooling and heat pump applications. Optimized for use with R22 and R410A refrigerants, it delivers quiet and consistent performance for residential and commercial systems. The unit includes an integrated accumulator for superior protection and is designed for straightforward installation and maintenance.

Technical Details

Core Features

- Integrated accumulator for system protection
- High-efficiency rotor design
- Optimized for quiet operation
- Suitable for heat pump and cooling systems

Compatible Refrigerants	R22, R410A
--------------------------------	------------

Application

Application Compatibility

Residential Air Conditioning • Commercial Cooling • Heat Pump Systems
