

# R410A R22 Air Conditioner 9000-18000 BTU

These air conditioners use R410A and R22 refrigerants and come in ON/OFF and DC Inverter models. They provide cooling from 9000 BTU to 18000 BTU.

## Overview

### High-Efficiency Climate Control

This range of air conditioners is engineered for versatile climate control in both residential and commercial environments. Available in both ON/OFF and DC Inverter configurations, these units prioritize energy efficiency and consistent temperature management. With a capacity range covering 9000 to 18000 BTU, they provide reliable performance and quiet operation for various space requirements.

## Performance

### Cooling Capacity Range

**9000 BTU**

Minimum Capacity

**18000 BTU**

Maximum Capacity

## Technical Details

### Compressor Technology

ON/OFF • DC Inverter

### Supported Refrigerants

R410A, R22

## Key Features

### Operational Features

- Advanced compressor technology
- Quiet operation
- User-friendly controls
- Residential and commercial suitability
